TASK – 5

Bank Transaction System Using Java

PROGRAM :

```
import java.util.Scanner;

public class BankTransaction {
   public static void main(String[] args) {
      Scanner sc = new Scanner(System.in);
      double balance = 1000.0;
      int choice;

      do {
         System.out.println("\n--- Bank Transaction System ---");
         System.out.println("1. Deposit");
         System.out.println("2. Withdraw");
         System.out.println("3. Check Balance");
         System.out.println("4. Exit");
         System.out.print("Enter your choice: ");
         choice = sc.nextInt();

         switch (choice) {
            case 1:
               System.out.print("Enter deposit amount: ");
               double deposit = sc.nextDouble();
```

```
    if (deposit > 0) {
        balance += deposit;
        System.out.println("Deposit successful.");
    } else {
        System.out.println("Invalid amount.");
    }
    break;

case 2:
    System.out.print("Enter withdrawal amount: ");
    double withdraw = sc.nextDouble();

    if (withdraw <= 0) {
        System.out.println("Invalid amount.");
    } else if (withdraw <= balance) {
        balance -= withdraw;
        System.out.println("Withdrawal successful.");
    } else {
        System.out.println("Insufficient balance.");
    }
    break;

case 3:
    System.out.println("Current Balance: " + balance);
    break;

case 4:
    System.out.println("Thank you for banking!");
```

```
                break;

            default:
                System.out.println("Invalid choice.");
        }
    } while (choice != 4);

    sc.close();
  }
}
```

INPUT :

Enter your choice: 1

Enter deposit amount: 500

Enter your choice: 2

Enter withdrawal amount: 200

Enter your choice: 3

Enter your choice: 4

OUTPUT :

Deposit successful.

Withdrawal successful.

Current Balance: 1300.0

Thank you for banking!
