TASK – 7

Hashtag Frequency Counter Using Java

PROGRAM :

```
import java.util.*;
import java.util.stream.*;

public class HashtagFrequencyCounter {
  public static void main(String[] args) {

    String text = "#Java #Python #Java #Coding #Python #Java";

    Map<String, Long> frequency =
      Arrays.stream(text.split("\\s+"))
        .filter(word -> word.startsWith("#"))
        .collect(Collectors.groupingBy(
          word -> word,
          Collectors.counting()
        ));

    System.out.println("Input Text: " + text);
    System.out.println("\nHashtag Frequencies:");

    frequency.forEach((hashtag, count) ->
      System.out.println(hashtag + " : " + count)
    );
  }
```

}

INPUT :

#Java #Python #Java #Coding #Python #Java

OUTPUT :

Input Text: #Java #Python #Java #Coding #Python #Java

Hashtag Frequencies:

#Java : 3

#Python : 2

#Coding : 1
